

Craftsman Refinishing, Inc “Careful Master Craftsmen”

Surrounds Installed

Property Owners and Managers are **demanding** a more affordable, quickly installable alternative to tile.

Over the years, apartment, hotel and construction industry professionals have complained how difficult tile is to install, clean and maintain. **Craftsman Refinishing’s** enclosures are the answer. They go up quickly and easily, cost less to install, and, because they don’t use grout, will not attract mold or mildew.

Thermally formed acrylic kits are stronger and more durable than grouted tile, fiberglass, and other bathroom enclosure materials.

- They have the look, feel and longevity of tile at a fraction of the cost.
- They install quickly and fit most bathtubs, shower pans and window frame configurations.
- They wipe clean quickly with soap and water, and attract no mold or mildew, thanks to the gloss acrylic finish.
- They won’t crack or yellow, require no gel coating or additives which prevent color fading.
- And they’re backed by our iron-clad 5-year warranty.
